

Hi. I'm Dr. Roeder. I've written this letter so you can get to know us a little better before actually coming to our office. Many patients want to know what they are going to experience with chiropractic care, how much it will cost, how long it will take, and what results they should look for. I'll try to answer some of these questions and some others that you may have.

How much will it cost? Each office visit in The Chiropractic Care Center is only \$37. That fee includes all procedures. You heard me right. All procedures. \$37 per office visit covers all x-rays, exams, therapies, and treatment on that day. There are never any hidden charges. If you choose to purchase a product in The Chiropractic Care Center that cost is separate, but that is always your choice, and as I stated earlier, all treatments, x-rays, exams, and therapies on that office visit are included in the \$37 fee.

When you walk into our office, you can expect to fill out a registration form that will let us know some things about your condition so that we will be able to treat you more effectively and customize your treatment plan to you. After you fill out your registration form, I'll bring you back to the consultation room and ask you a few questions about your condition so that I can know exactly how long you have had your condition, how it occurred, who you've seen for treatment before, if that was successful, and if not, what we need to do differently to get you back on your feet again and functioning properly. More than likely, we will take x-rays of the area of concern. We will also do an examination to further detect any problems. We do not like to guess about your condition. We like to know exactly what we will be treating, and what treatments you will respond to the best.

Once we have completed this process, we'll sit back down in the consultation room and I'll go over my findings from the examination and x-rays and I'll make some recommendations about your condition regarding what kinds of treatments I believe you will respond to. I want you to understand your condition, how, and why we are treating you. This process, including the first treatment all happens on the first office visit, and will generally take 45 minutes to one hour. After your initial office visit, you can expect to be in and out of our office for subsequent visits in about 10 to 15 minutes.

Once I have given you my recommendations for your care, the choice is always up to you. The Chiropractic Care Center specializes in corrective care. That means we want to find the cause of your pain or discomfort and work toward eliminating it. After we have restored your body to optimum function, we would like to help you stay as healthy as possible. It is always your choice whether or not to continue to benefit from chiropractic care in the form of a maintenance schedule to prevent a relapse. If you choose to discontinue care, that's your choice, and that's okay. - We will be happy to help you in any way we can.

I'm Doctor Roeder with The Chiropractic Care Center, where care is our middle name. I'll look forward to seeing you soon.

Sincerely,

Matthew R. Roeder, D.C.
